#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 31 October 2005.
- 2a) This action is FINAL.                            2b) This action is non-final.

Claims 18-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10-18-5.

This application contains claims directed to the following patentably distinct species of the claimed invention: The species wherein the first adhesive holding region and the second adhesive holding region are provided within one plane and are differentiated in level.

**Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein the first adhesive holding region and the second adhesive holding region are provided within one plane and are differentiated in level for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.**

Applicant is advised that a reply to this requirement must include an identification of the species from the species wherein the first adhesive holding region and the second adhesive holding region are provided within one plane and are differentiated in level that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

This application contains claims directed to the following patentably distinct species of the claimed invention: The species wherein the second adhesive holding region is confined within the first adhesive holding region and the first adhesive holding region is confined within the second adhesive holding region.

**Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the species wherein the second adhesive holding region is confined within the first adhesive holding region and the first adhesive holding region is confined within the second adhesive holding region for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.**

Applicant is advised that a reply to this requirement must include an identification of the species from the species wherein the second adhesive holding region is confined within the first adhesive holding region and the first adhesive holding region is confined within the second adhesive holding region that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment

Art Unit: 2822

of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
